

RICH IN VITAMIN E

SELI Fécondité

Year round

SELI Fertility is enriched in vitamin E, iodine and selenium in order to prevent nutritional deficiencies that could lead to fertility problems. As a result, it is important to add these trace elements to their diets in order to help maintain that function.

Iodine and selenium affect growth, breeding and lactation.

INSTRUCTIONS FOR USE

Average daily intake:
40g/cow or horse; 5g/sheep or goat.

COMPOSITION

Sodium chloride – Calcium carbonate –
Additive premix

ANALYTICAL CONSTITUENTS (%)

Sodium.....39
Calcium.....0,3

ADDITIVES / TRACE ELEMENTS (mg/kg)

Iodine (anhydrous calcium iodate).....300
Selenium (sodium selenite).....30

VITAMINS (IU/kg)

Vitamin E850

12 and 25 kg
