

FOR RESPIRATORY COMFORT
(made from plant extracts)

Autumn - Winter

Animals' respiratory systems are fragile and complex. Diet, stress, gasses, and viral and bacterial infections can all disrupt their delicate balance.

SODIRESPI, which is rich in plant extracts (eucalyptus, pine, coltsfoot, etc.) and essential oils (thyme, rosemary, tea tree, mint, etc.), contributes to respiratory comfort in animals.

Its formula is further enhanced by minerals and trace elements to prevent the main deficiencies observed in livestock.

INSTRUCTIONS FOR USE

Mean daily intake: 120 g/cow;
24 g/goat; 15-20 g/sheep; 50-100 g/horse.

COMPOSITION

Sodium chloride, dicalcium phosphate, calcium carbonate, molasses, magnesium oxide, lithothamne, plant extracts (coltsfoot, pine needles, eucalyptus leaves*, pine buds*, garlic*): 900 mg/kg.

** Organically farmed ingredients*

ANALYTICAL CONSTITUENTS (%)

Calcium.....	9
Phosphorus.....	3
Sodium.....	25
Magnesium.....	1,5

ADDITIVES - TRACE ELEMENTS (mg/kg)

Aromatic substances (essential oils)	
Zinc (zinc oxide).....	3000
Manganese (manganese oxide).....	2500
Iodine (anhydrous calcium iodate).....	30
Cobalt (granules coated with cobalt carbonate).....	30
Selenium (sodium selenite).....	10

5 kg or 11 kg

CATTLE

SHEEP

GOATS

HORSES
