

**CONTAINS GARLIC  
PROTECTS AGAINST INSECTS AND PARASITES**

# **SODI** Patur'ail

**Spring - Summer**

SODIPATUR'AIL contains garlic, which helps to protect livestock against insects. Once ingested, the garlic produces volatile sulphur compounds which naturally repel most insects (flies, ticks, etc) due to the smell emitted. Garlic also protects against a large number of parasites (such as roundworm or lungworm) as it can prevent eggs from hatching. This block is also rich in phosphorus and calcium.

## FEED APPLICATIONS

Average daily intake: 120g per bovine, 25g per goat, 15-20g per sheep, 50-100g per horse

## INGREDIENTS

Sodium chloride - Dicalcium phosphate - Calcium carbonate - Cane molasses - Garlic (4%) - Magnesium oxide - Premixture of additives.

## ANALYTICAL CONSTITUENTS

Phosphorus.....	5%
Calcium.....	14%
Magnesium.....	2,5%
Sodium.....	15%

## ADDITIVES – TRACE ELEMENTS (mg per kg)

Zinc (zinc oxide).....	3000
Manganese (manganous oxide).....	2500
Iodine (calcium iodate anhydrous).....	30
Cobalt (cobalt (II) carbonate coated pellets).....	30
Selenium (sodium selenite).....	10

**11 kg or 20 kg**

**SHEEP**

**GOATS**

**HORSES**

**CATTLE**
